Alex Morgan

Melbourne, VIC | alex.morgan@example.com | 0400 000 000 | github.com/alexmorgan-demo

Professional summary

Graduate cyber security analyst with 1.5 years of hands-on experience in IT support and a security internship. Interested in SOC analyst and incident response roles. Strong troubleshooting and communication skills, with practical experience in network security, Linux and vulnerability scanning.

Skills

Technical: Networking (TCP/IP, DNS, DHCP, VLAN), network security, vulnerability scanning, incident handling, Python, Linux, Bash, SQL, risk assessment, active directory, MFA

Tools: Wireshark, Nmap, Nessus, Git, GitHub, Jira, Microsoft Excel

Soft skills: Communication, teamwork, problem solving, attention to detail, time management

Experience

Security Analyst Intern — Southbank Logistics (fictional), Melbourne *Jun 2025 – Dec 2025*

• Responsible for running weekly Nessus vulnerability scans across 120 endpoints.
• Worked on triaging phishing emails reported by staff and escalating confirmed cases.
• Wrote a Python script that parsed firewall logs and flagged repeated failed logins, cutting manual review time by 40%.
• Helped update the incident response checklist after a simulated ransomware exercise.

IT Support Officer (part-time) — Victoria University IT Service Desk *Jan 2024 – May 2025*

• Resolved 25+ tickets a week for password resets, MFA setup and network issues.
• Managed user accounts and group policies in Active Directory.
• Responsible for documenting common fixes in the team knowledge base in Jira Confluence.

Education

Bachelor of Information Technology (Cyber Security) — Victoria University, Melbourne *2023 – 2026*
Relevant units: Data Analytics for Cyber Security, Network Security, Ethical Hacking, Database Systems

Projects

Home lab SOC: Built a virtual lab with a Kali Linux attacker and Ubuntu target, captured traffic in Wireshark and documented detections for port scans.
Malicious website detection: Built a classifier in R to flag malicious URLs from lexical features (university assignment).

Certifications

Cisco Networking Basics (completed) | Currently studying for CompTIA Security+
